

LogPoint Training

User
Administrator
& Director

Educational Focus

Planning – Enables you to plan the implementation and allocate required resources for the deployment process. You will learn to design reports, alerts and dashboards to best suit your business requirements design

Managing – Allows you to allocate the essential resources to manage your implementation process and administer the solution once deployed, ensuring it remains updated and relevant on a continuous basis.

Evaluating – Empowers you to evaluate your installation and analyze if it is providing the value needed to meet your organizational KPIs, or if adjustments are needed based on reevaluated business requirements.

Grow your skillset and improve the workflow

Our LogPoint User and Administrator Training has long been popular with both customers and partners, who are either new to LogPoint or existing users, who want to grow their skillset and acquire improved routines for working with or administering the solution on a daily basis.

Training Setup

Throughout a two-day training session - or five days if completing both user, administrator and Director training - a LogPoint Certified Expert will display the features of the solution, look into real-world use cases, highlight performance considerations and teach how all the various blocks can be combined.

Focus will include facilitation of knowledge exchange between participants, as our experience confirms that to be an excellent technique for acquiring familiarity with the solution. Further, emphasis throughout the training will be on ensuring the course is conducted to accommodate the levels and requests of individual participants.

Areas Covered

The training sessions may be adjusted to catering to requests of larger groups of participants such as several participants from the same organization.

Overall, we will cover general activities, such as introductions and an overview of SIEM and LogPoint. Each training section is followed by hands-on exercises in a training environment.

User Training (2 x days)

1. LogPoint User Demonstration
2. LogPoint Help Center Overview
3. Dashboards
4. Searching
 - a. Simple Search
 - b. Key/Value Pairs
 - c. Labels
 - d. Public URL
5. Search Templates
6. Search Views
7. Correlated Search
8. Enrichment
9. Reporting
10. Alerting and Incidents

LogPoint Administrator Training (2 × days)

1. LogPoint Administrator Demonstration
2. LogPoint Help Center Overview

 - a. Command line options
 - b. How to get support

Director Training (1 × day)

1. Director Demonstration
2. Lab environment
3. Connecting to the Fabric
4. Uploading Application
5. Creating entities
6. Edit or deleting entities
7. Dashboard

Top 5 Take Aways

1

Introduction to LogPoint
tailored to suit the needs of the
individual participants

2

Best-practices when
working with the solution

3

Use-case examples from
other organizations

4

Networking with other
LogPoint users and
exchange input

5

Input on how to manage
your own or your customer's
installation

*Participating in LogPoint's training
has given me new insights on the
functionality of the solution.
I am now more aware of best
practices and small tweaks, which can
make a huge difference and can assist
me in implementation and operational
efforts. Further, the knowledge shared
and obtained by engaging with other
training participants has not only
provided me with use-case examples
but also a network of other LogPoint
users, which I can consult if I need a
second opinion.*

- Johan Aagaard, Senior Security Advisor

Bespoke Training

We also offer customized training for organizations, which focus solely on your organizational needs and deployment. Based on experience, we can recommend a tailored agenda to suit your exact needs.

Contact us for more information.

Who should participate

IT and Information Security Professional, such as Consultants, Auditors, Managers, Engineers and Administrators.

All participants stand to gain valuable insight on how to implement, configure, and fine-tune SIEM technology. This enables the participants to automate processes, create compliance reports and documentation and reduce false positives by monitor, identify, document, and respond to security threats in a more effective way.

Prerequisites

- Workstation, desktop or laptop computer
- Remote desktop with NLA (Network Level Authentication)

- The ability to read PDF, PowerPoint, Word and Excel documents
- Chrome, Firefox or Safari browser

Training Details

The LogPoint Training take place on several occasions throughout the year at different European locations. It is comprised of a virtual lab and supporting documentation where the training is delivered in a friendly and somewhat technical workshop style. The training sessions accommodate maximum 10 participants.

The training will be facilitated by a LogPoint expert and is

usually conducted in English, French or German to suit a multilingual audience.

Want to Know More?

We have a proven track record of training customers and partners to ensure they reap the benefits of their LogPoint implementation. Do you want to know more about which of our training tracks that is right for you? Please contact us for more information.
