

Strength through simplicity.

As the world digitizes, LogPoint is more dedicated to building an innovative, intuitive, and reliable cybersecurity operations platform than ever.

The Challenges

Ineffective Risk Management

The SIEM and SOAR platform accelerates threat response and limits false positives.

Sluggish Threat Detection

The UEBA module deploys instantly, pinpointing and prioritizing abnormal activity.

Blind Spots

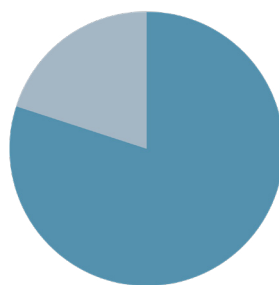

LogPoint for SAP centralizes threat monitoring and automates compliance and auditing.

Results and Feedback

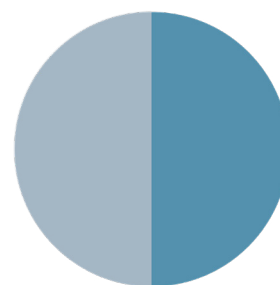

90% decrease in incident response time

80% increase in IT infrastructure visibility

80% savings on administrative resources used for log analysis

50% cost savings overall
