

# LOGPOINT SOAR

As cybersecurity incidents and the volume of data they generate grow exponentially, organizations struggle to detect and respond to threats. Logpoint SOAR reduces risk while improving your SOC team member's efficiency.

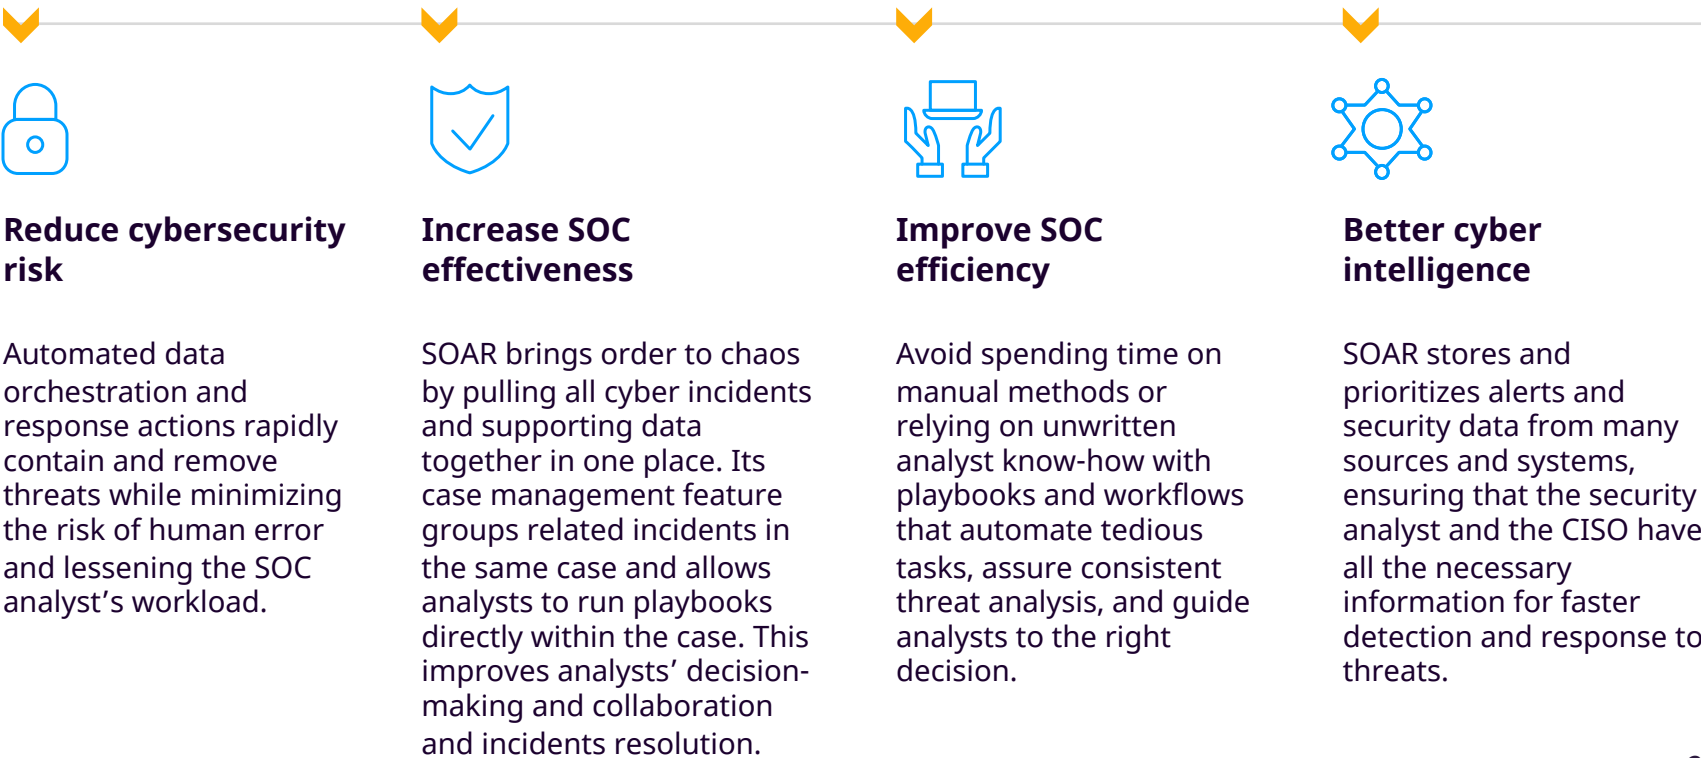

# CREATING BUSINESS VALUE

Logpoint SOAR is an innovative security orchestration, automation and response (SOAR) solution that brings cybersecurity efficiency and effectiveness to mid-sized businesses.

Seamless integration with Logpoint SIEM and open APIs make Logpoint SOAR highly accessible and affordable, providing much needed solutions to reduce cybersecurity risk and increase security operations center (SOC) productivity. Structured case reporting makes it easy to evaluate and document Logpoint SOAR's effectiveness and communicate security's value to management

Logpoint is committed to bringing the benefits of SOAR to all organizations, including mid-sized businesses. Logpoint SOAR provides immediate and long-term value for managing cybersecurity risk and improving not only cyber intelligence but also operational efficiency that translates in:

# INCREASE ANALYST EFFICIENCY WITH LOGPOINT SOAR

Logpoint SOAR automates and improves your ability to rapidly detect, investigate, respond and report every cyber incident.

**Ready-to-use playbooks**  
More than 80 out-of-the-box playbooks help you automate standard processes right away and can easily be customized.

**Easy to use**  
With modular and adjustable playbooks, it is easy to tailor them to your needs using a drag-and-drop interface.

**Guided decisions**  
SOAR automatically investigates alert data from multiple systems and recommends a response. Analysts simply approve or execute that decision, significantly increasing SOC productivity, even with limited resources.

*Ready-to-use playbooks help guide analysts to quicken decisions and optimize SOC team collaboration.*

# MEETING CUSTOMER NEEDS

Cases / User reported Phishing from:phisher@badurl.com

Logpoint SOAR enables quick, consistent, and more precise response.

**Time to value**  
Out-of-the-box integrations and open APIs provide fast and seamless connectivity to other cybersecurity systems, including other SOARs, so you're up and running in no time.

**Best practices**  
Our community of Logpoint users and partners shares playbook knowledge to ensure the use of best practices to detect, investigate and respond to threats.

**Customer-centric**  
Logpoint is built on a customer-first culture. We go the extra mile to solve problems and regularly include our customers' feedback and feature requests in our roadmap.
