

THE ONE-STOP PLATFORM FOR INFRASTRUCTURE MONITORING AND SECURITY

Customer experience has emerged as a crucial success metric for SaaS companies globally. Delivering an outstanding experience is built upon a web of interconnected technologies that collaborate to provide a consistent and efficient way of servicing your customers. As the customer experience becomes more intricate, the underlying technology becomes increasingly complex, making efficient infrastructure monitoring an increasing challenge.

Monitoring the IT infrastructure with Logpoint

Continuous monitoring and analysis of your infrastructure's health, performance, and security require a robust platform that efficiently collects data, analyzes, visualizes, and alerts you when anything is out of the ordinary. With Logpoint, you will get:

- 1. Improved visibility:** With infrastructure monitoring, organizations can gain a comprehensive view of their IT systems, allowing you to identify and resolve issues quickly.
- 2. Enhanced performance:** Infrastructure monitoring helps organizations optimize their IT systems for maximum performance and efficiency.
- 3. Increased security:** By monitoring infrastructure, organizations can detect and respond to security threats before they cause damage.

Reduce operational uncertainty

Eliminate blind spots and efficiently scale with no surprises

Reduce alert fatigue with automation

Automate the response to alerts to fix problems fast and limit manual efforts

One Platform

Integrate alerts and data into a single source of truth to increase operational efficiency

Extensive, complex infrastructure – few employees? Logpoint licensing is made for you!

Logpoint is licensed on the number of employees in your organization, meaning that you do not have to worry about the ever-changing and difficult-to-scope infrastructure that comes with running a SaaS business.
