

 **LOGPOINT**

LOGPOINT SIEM

**A FAIR MODEL FOR
LOCAL GOVERNMENT**

When it comes to SIEM and security awareness, Local Government organisations often experience having to prioritise and limit the monitoring of their IT infrastructure due to the data volumes and large amount of users. Logpoint has therefore created a tailored license for Local Government organisations, which enables coverage of the entire IT infrastructure for a set cost based on the number of residents in that administrative area. This license is available for all Councils throughout the United Kingdom. This creates a predictable licensing model.

BACKGROUND FOR THE LOCAL GOVERNMENT LICENCING

Pricing Assurance – A unique Enterprise SIEM subscription license for all UK Local Government organisations (County, District, London Boroughs, Metropolitan Districts and Unitary Authorities). It is a fair model where the license is calculated based upon the number of residents in the administrative area, calculated as set cost of £0.25p per resident.

All Local Government organisations over 300,000 residents, the cost will be set at £75,000 per year.

All Local Government organisations with 160,000 residents or below are assigned a highly discounted set cost of £40,000 per year.

We have then fixed that price for the term of the contract, enabling Local Government organisations to utilise the Logpoint software without restriction across their entire estate.

- No restrictions on the number of Logpoint instances installed.
- No restriction on the number of log sources.
- No restriction on the volumes of log data.
- Assurance of no price increases on Logpoint SIEM throughout the term of contract.
- Includes one concurrent user licence of Logpoint's SOAR technology.

There is of course still the possibility to invest in licenses, which are calculated based on devices as per the usual Logpoint licensing model.

For more information about the model please contact: uk@Logpoint.com

Disclaimer: Pricing is valid until 31st March 2024 | A 1,000 Node license will be provided upon purchase. Additional nodes may be provided upon request under Logpoint consultation | UEBA is excluded | Logpoint integrates log formats from widely used commercial off-the-shelf platforms; if unsupported, at time of investment, will be included free of charge
